Discover the many possibilities of Original Seed Paper®. A zero waste product with a message.

WE CARE,

about you and us.

Original Seed Paper® is a product with guaranteed quality. With this quality standard, we want to offer our customers certainty and make nature a little more flowery. Based on our long-term perspective, we aim to create real value in the markets of zero waste products: value for people and the environment.

Our product is zero waste, which means it has no negative impact. In addition, we are paying increasing attention to our production process and how we can make it more sustainable. We want to achieve this, by reducing the energy consumption in our manufacturing processes and by choosing suppliers regionally.

We value people by being a sustainable employer, and corporate social responsibility (CSR) is important for us. Being a good employer is not only shaped by offering a good salary and terms of employment. Employee appreciation is essential. Without our staff, no product. We are well aware of this and therefore take extra good care of our team. About half of our team consists of people with a distance to the labor market. In all departments, there are people who are great in their own fields, so together we make beautiful products. 'Let people do what they are good at and enjoy their work' is our most important goal.

INTRODUCTION

ORIGINAL SEED PAPER® REPRESENTS QUALITY

MADE IN THE NETHERLANDS

We produce the 50 and 80 gram seed paper entirely in-house, in other words 'made in the Netherlands'. We continue to develop to produce other weight seed paper sorts in-house as well.

ZERO WASTE

Original Seed Paper® is 100% biodegradable. The inks we use for printing are also biodegradable, which means that even a printed sheet is fully zero waste.

QUALITY SEEDS

Since the beginning of 2015 we are SKAL certified. This means that we are allowed to trade organic seeds and process them in our products. All our seeds are Non-GMO.

BEE FRIENDLY

In the Netherlands and many other countries, bees have greatly declined in numbers. The field flower mix in the seed paper improves the bee's living conditions and that helps to improve biodiversity.

we would love to show you
HOW IT'S MADE,

With more than 40 years of experience, we are proud that our seed paper has been developed to a high quality. We guarantee an 80% germination rate, making Original Seed Paper® the best seed paper in the Netherlands. From our production facility in Terborg, we fully manufacture our Original Seed Paper. Besides delivering high quality, our goal is to further develop our paper. This means we are working on different thicknesses, colours, formats and seeds.

To produce the seed paper, we use in-house developed production machines, different printing techniques, seeds and formats. Our standard seed paper contains a field flower mix, which attracts bees and butterflies.

If desired, we can produce seed paper with various types of seeds. These include flower, vegetable and herb seeds. The main requirement here is that the seeds are small enough to fit into the seed paper, but we are always ready to get challenged by our customers with new sorts of seeds.

In this catalogue, we show our great flexibility in paper sizes, shapes and types. Most standard as A4 and A5 are most commonly supplied, but we like to make special customer wishes a reality.

OUR SELECTION,

01

01. FLYERS

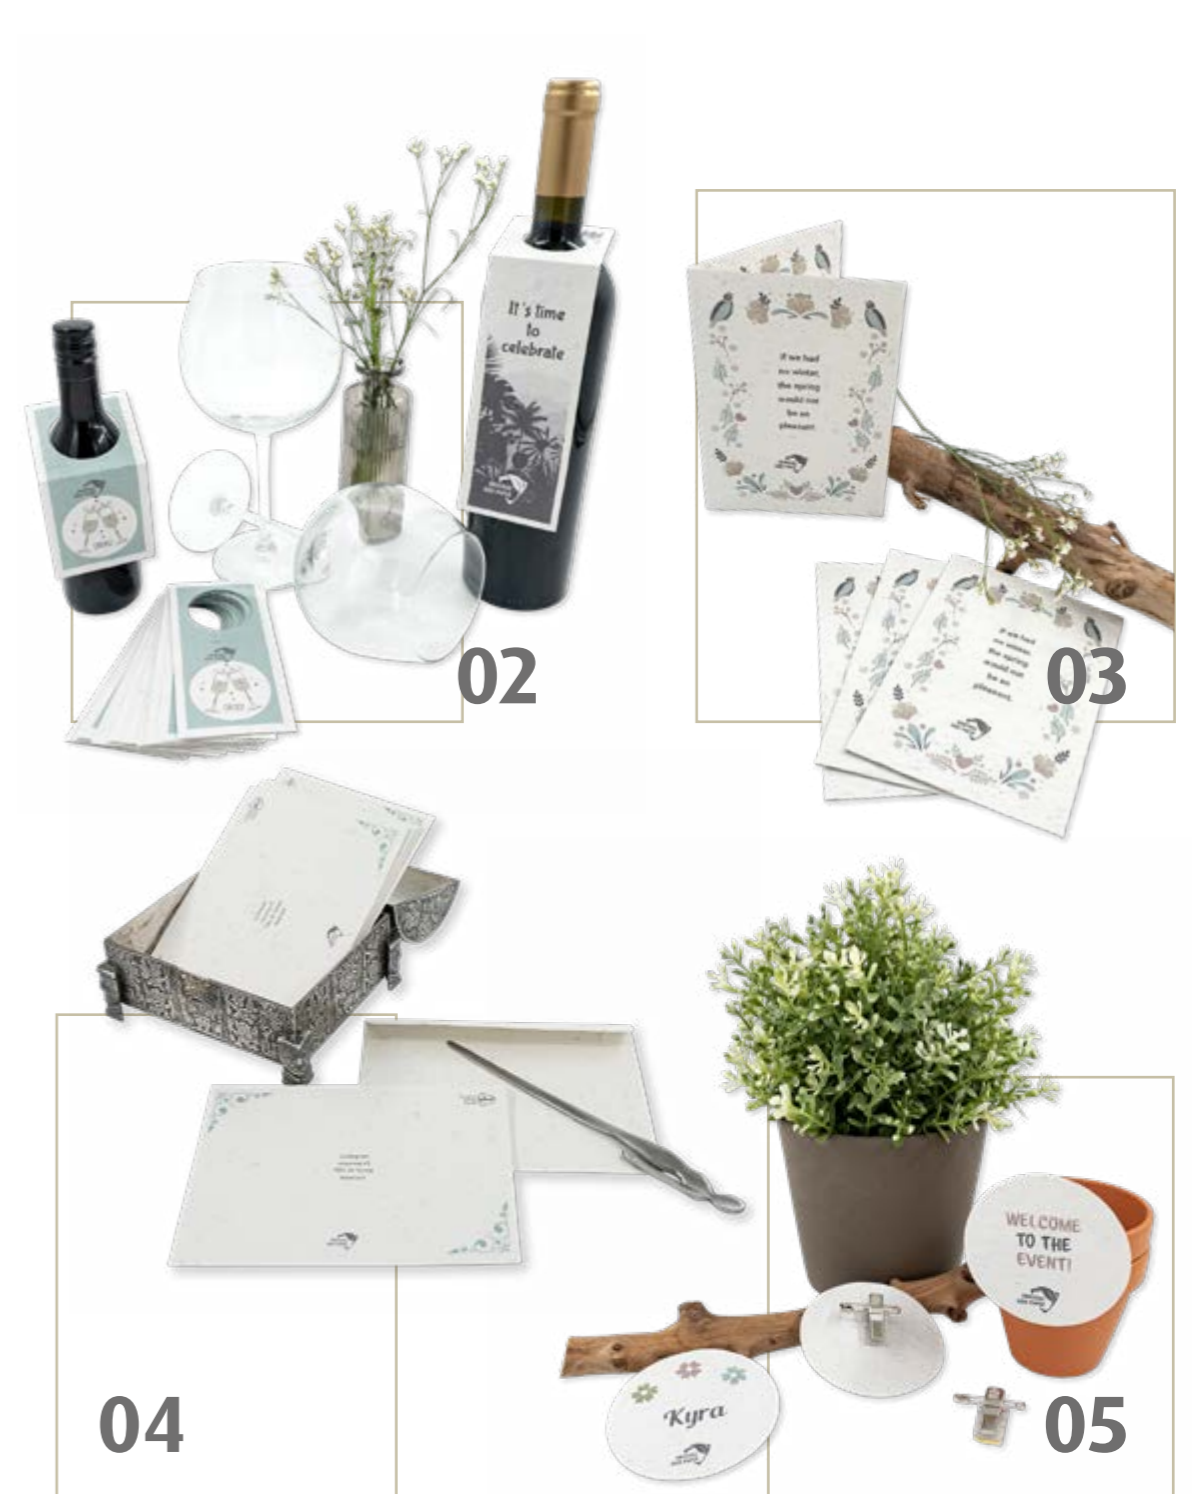

To spread your message as quickly and widely as possible, flyers are the ideal medium. You can use them to inform your customers about products and services, as well as events and offers.

In case of insufficient space, Original Seed Paper® also offers you flyers (greeting cards). You can provide the design yourself or let us design it for you. The flyers can be printed on one or both sides as desired.

02. SHAPES

A house, car, dog or tree. All different shapes that we all immediately recognise. Make your message extra eye-catching by making your flyer in a recognisable shape.

We have many shapes that we can produce for you right away. If your shape is not yet available, we will be happy to develop it together with you. In fact, nothing is too out of the ordinary!

03. GREETING CARDS

Do you want to make personalised cards to hand out to your customers? Or do you want to make cards to highlight or congratulate your staff?

Whatever your reason, you've come to the right place at Original Seed Paper. We have several sizes available. You can make your postcards extra sustainable by sending them in an Original Seed Paper® envelope.

04. ENVELOPES

Post your flyer or card in a matching Original Seed Paper® envelope. These can be printed on both sides.

05. EVENTS

Make your event extra ecofriendly with zero waste seed paper products, such as wristbands, name badges and keycards.

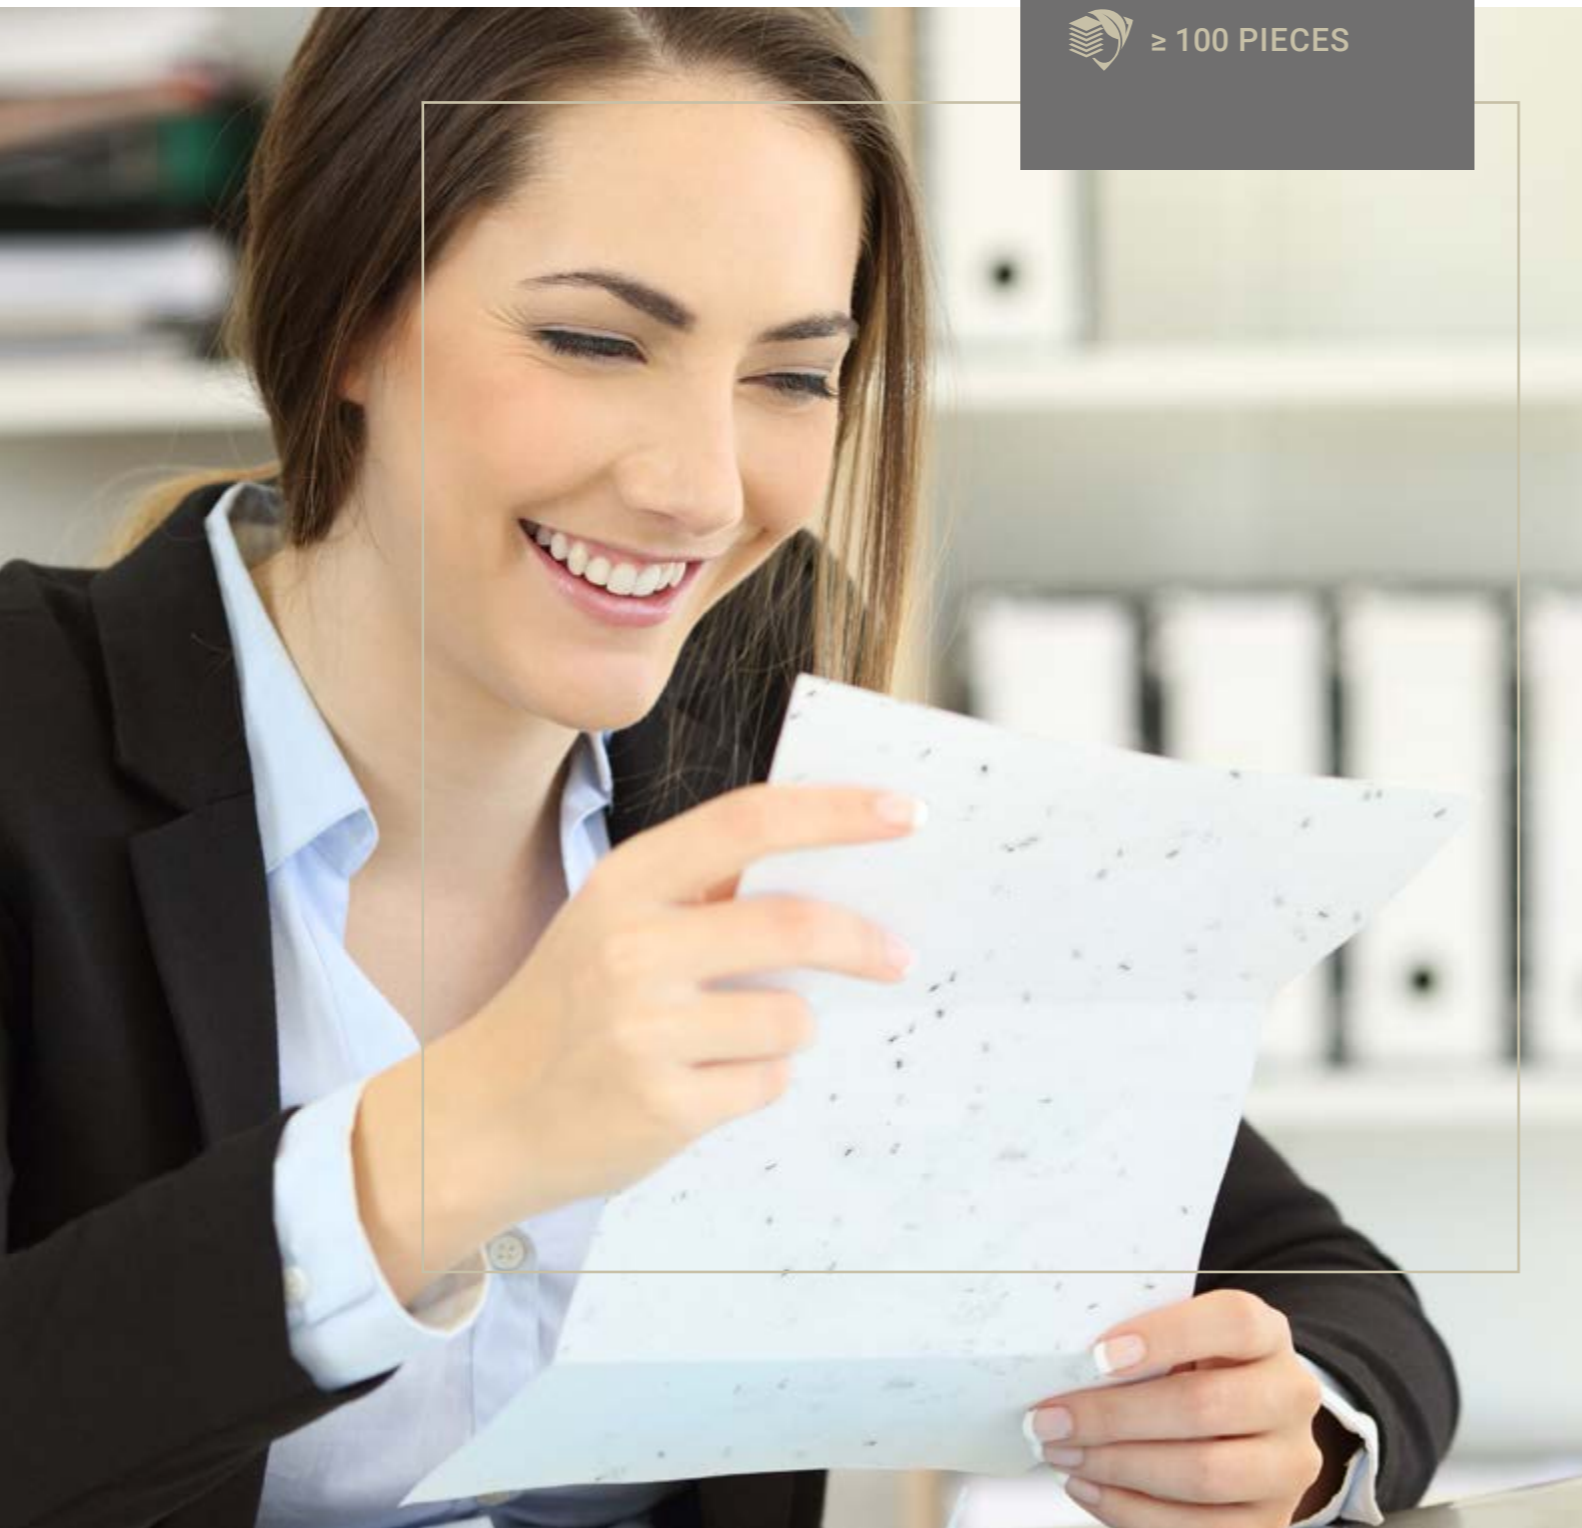

FLYERS

Reach your target audience quickly and affordably with a flyer. Flyer printing is an efficient way to spread your message to a large audience. At Original Seed Paper®, you can order flyers in exactly the format that suits your message: our clients usually order A5 flyers, but anything between A3 and A7 is possible. The design of your flyer is up to you, of course, and there are a lot of possibilities.
